S&M Moving Systems Features Controlled Climate Storage

(Phoenix, AZ, December 23, 2008) – S&M Moving Systems now features a new controlled climate storage warehouse in Phoenix.

The new capabilities feature a constant 70 degrees year round with under 50% humidity. The 14,000 square foot dedicated space includes Nitrogen Purging – ideal for the semi-conductor and the optic industries.

Additional service offerings include the option to utilize climatic transportation both in and out of storage, the ability to control both temperature and humidity of high value cargo other services offered are crating and skidding services, high-cube vans and air-ride vans.

“Serving our clients in the high-tech world where we provide a controlled environment is essential to their success in the local market,” said **Anthony Locatelli**, Chief Operating Officer of S&M Moving Systems. “Expanding how we provide value with our new controlled climate storage allows us to be a complete solution for their transportation and warehouse needs.”
