

TRADESHOW

At S&M Moving Systems, our entire staff of on-site show coordinators, operations specialists, customer service specialists, sales professionals, and drivers are dedicated to delivering excellence in the management and shipping of your critical marketing tools.

With our Airfreight division, S&M Moving Systems offers you a full range of options when planning and controlling the transit of your promotional materials. Our network of United agents and our various UniGroup programs give you the flexibility of shipping exhibits tailored to meet your individual needs. We will ship your exhibits and displays crated, blanket wrapped, and/or partially assembled, which saves time on set up.

All vans are air ride equipped with cargo control systems to secure your exhibit. Additionally, with our unique VanStar satellite tracking and communication system we can pinpoint your exhibit location at anytime, anywhere through our NetTrac System.

Whether it's one show or a multi-city tour involving several vans and storage along the way, your needs will be coordinated every step of the way when using S&M Moving Systems.

SERVICES INCLUDE:

- Shipment of materials crated, blanket wrapped, and even partially assembled.
- Use of air ride equipped vans and cargo control systems to secure exhibits.
- Satellite tracking capabilities through the VanStar system.
